

**Model ID120A DI**  
**Standard Clearance**

**Iron Construction**

**101.6 x 76.2 mm Std. Port Size**

Viscosity: 100 cst

Viscosity: 1,000 cst

*There are many additional factors to consider when selecting a pump, including (but not limited to) suction conditions, temperature limitations and material compatibilities. Curve data is typical only, actual performance may vary. Consult the factory or an authorized Tuthill Pump Group representative for assistance.*

*Created on November 30, 2000*

# Model ID120A DI

## Iron Construction

## Standard Clearance

## 101.6 x 76.2 mm Std. Port Size

There are many additional factors to consider when selecting a pump, including (but not limited to) suction conditions, temperature limitations and material compatibilities. Curve data is typical only, actual performance may vary. Consult the factory or an authorized Tuthill Pump Group representative for assistance.
